GENERAL COMPANY DESCRIPTION

CampusBox is a student-focused subscription service delivering curated campus essentials and lifestyle items. It aims to enhance student life through convenience, affordability and personalized experiences. The company connects brands with students via monthly themed boxes. It operates through an online platform targetting university communities.

THE INNOVATIVE CONCEPT

CampusBox introduces a unique subscription model tailored for students.

- Monthly curated boxes based on student needs
- Collaboration with student-friendly brands
- Personalized selections using user preferences
- Affordable pricing for budget-conscious users
- Integration of campus trends and seasonal themes
- Digital platform for easy ordering and feedback
- Surprise elements to enhance user experience
- Opportunity for small businesses to showcase products
- Community engagement through events and promotions
- Focus on convenience and time-saving solutions

THE BUSINESS IDEA AND MARKET NEED

CampusBox addresses the need for convenient and affordable student products. Many students lack time to shop for essentials regularly. The service provides curated solutions in one package. It targets a growing student population with increasing online purchasing behaviour. The idea also supports small businesses by giving them exposure. Market demand is driven by convenience, affordability and personalized trends.

THE CHALLENGES AND THE NEED FOR SUPPORT

The project may face challenges such as initial funding, logistics management and customer acquisition. Competition in subscription services is also a concern. Support is needed in terms of investment, partnerships and marketing. Technical improvements and user feedback will be essential for growth. Guidance from mentors and industry experts will help in scaling the business

1. Business description

1.1 Short business distribution

Campus box is a Pakistan-based monthly subscription box service created for university students. Each box is curated collection of stationery, snacks, self-care products and motivational cards, delivered to subscribers every month. It targets Pakistan's 1.5 million + university students - a large, digital active and underserved demographic that currently lacks a dedicated lifestyle subscription brand.

1.2 Description of the venture

University life in Pakistan is a demanding journey, often leaving students with little time or budget to prioritize their own well-being and joy. CampusBox fills this void by delivering a monthly “dose of student life” directly to their doorstep or campus. Our venture is built on understanding the pulse of the Pakistani student: their love for aesthetics, their budget constraints and their needs for reliable, exciting treat during stressful academic periods. CampusBox is the answer to a simple question: “What if every student could have something to look forward to at the start of every month?”

The venture generates revenue through two primary, synergistic channels. The first is a B2C online subscription model via Instagram and WhatsApp, providing nationwide delivery. The second is a direct-to-consumer campus channel through bi-monthly pop-up stalls at Riphah University and partner campuses. This hybrid model maximizes brand visibility and ensures we are embedded directly within the student community we serve.

1.3 Mission Statement

To make every Pakistani University student feel seen, supported and celebrated - one box at a time.

1.4 Products or Services

CampusBox offers structured subscription tiers to suit diverse student budgets, along side flexible, one-time purchase options:

Table 1 Products and Services

Box Tier	Contents	Price/Month
Basic Box	1 notebook, 1 pen set, 1 snack, 1 motivational card	Rs. 700
Standard Box	Notebook, pen set, 2 snacks, self-care item, motivational card, sticker sheet	Rs. 1,000
Premium Box	Full Standard + bonus item (mini-planner, scrunchie, candle), aesthetic packaging, handwritten note	Rs. 1,400

Additional offerings include one - time gift boxes for occasions like Eid, birthday and graduations, seasonal special editions (e.g, Exams Survival Kit, “Winter Warmers”) and Institutional Orders for university societies and events.

Figure 1 Communication of users with CampusBox

Figure 2 Flow Chart Diagram for Campus Box

1.5 Company's goals and objectives

- Launch with 20 active subscribers in month 1, going to 100 + by months 12.
- Growth the @campusbox.pk Instagram account to 1000 + engaged followers within year 1.
- Participate in a minimum of 4 University campus markets per semester.
- Introduce one new themed box per quarter to maintain novelty and excitement.
- Achieve full profit ability and recover the initial investment within 6 months.
- Establish a gift subscription option and expand delivery to 5 + universities across Islamabad Rawalpindi by year 2.

1.6 Business Philosophy

Our core philosophy is that student life deserves to be celebrated, not just survived. We are committed to creating genuine moments of joy, motivation and self-care for a demographic that often puts themselves last. Every campus box is assembled with meticulous care, creative theming and a deep understanding of what students truly need and love. We reject generic filler items, choosing only thoughtfully selected products that add real, functional and emotional value. We believe in affordable joy, aesthetic presentation and building a brand that feels like a supportive friend throughout the university journey.

1.7 Anticipated Customer

Our anticipated customers are of two distinct types, forming a robust B2C and B2B model. The primary B2C segment is individual university students aged 18-26, enrolled in institutions across Islamabad and Rawalpindi and eventually nationwide. They are active on Instagram and Whatsapp, comfortable with digital payments like EasyPaisa and JazzCash and have a monthly personal budget of PKR 3,000-8,000. These students seek affordable, curated experiences that provide a sense of excitement and self-care amidst their demanding academic routines. They are not just buying products, they are subscribing to a monthly moment of joy.

The secondary segment includes parents, friends and partners purchasing gift subscriptions for occasions like Eid, birthdays and exam season, as well as institutional clients such as university student societies and event organizers ordering bulk boxes for orientations, welcome kits and campus events. This dual-customer approach ensures diversified revenue streams and positions CampusBox as both a personal treat and a meaningful, ready-made gifting solution within the student ecosystem.

1.8 Business Model Canvas

Figure 3 Business Model Canvas for Campus Box

2. Industry Description

2.1 Type of Industry

Campus box sits at the meeting point of three different but connected industries. Subscription box and e-commerce--think of services like beauty box or snacks subscriptions that you up at your door every month, Student lifetime and stationery--notebooks, pens, self care items and everything a student need, Gifting and self care--because who doesn't love receiving a thoughtful gift or treating themselves? Instead of going to a store a curated box of goodies arrives at your door step every month. Pakistan is just starting to catch on this trend and campus box wants to be at the front of it.

2.2 Outlook and trends of Industry

Pakistan's online shopping scene has exploded since 2020. Why? Three big reasons:

- More smartphones in people's hands
- More time on social media (Instagram, WhatsApp)
- A young, tech-savvy population that's comfortable buying things online

Instagram-based businesses have become totally normal now. If you're between 16 and 30 years old, you've probably bought something through an Instagram DM or WhatsApp. It's just how shopping works these days.

Here's the interesting part: Subscription boxes are huge globally, but in Pakistan? They're still rare. And nobody (literally no brand)is making subscription boxes specifically for university students.

The few subscription services we do have in Pakistan are aimed at working women with good salaries. But students? With over 1.5 million enrolled university students in Pakistan? Completely ignored.

These students are active online. They have pocket money. They shop on Instagram. They just need someone to offer them something made for them.

2.3 Key Industry Trends

- The fashion and lifestyle sectors in Pakistan are seeing an increase in small businesses that use Instagram and WhatsApp. These Instagram and WhatsApp-based small businesses in Pakistan are doing well.
- Instagram and WhatsApp-based small businesses are becoming very popular in Pakistan's fashion and lifestyle sectors.
- Young people, known as Gen Z consumers like it when things are personalized and look good.

- Gen Z consumers like personalization, aesthetics and curated experiences. Many university students in Pakistan are taking care of their health. This self-care and mental wellness culture is becoming very popular among university students.
- In Pakistan people like to give gifts on occasions like Eid, birthdays and graduations. This creates a demand for gifts at certain times of the year.
- There is a gifting culture in Pakistan. Students in Pakistan are getting comfortable with paying for things
- Many student-run businesses are selling their products directly to consumers on university campuses. University campus markets are a way for student-run businesses to sell things. University campus markets are sales channels for student-run businesses.
- The global subscription box market is growing fast at 18% every year. This trend is now happening in Pakistan. The global subscription box market is reaching Pakistan.
- More and more students in Pakistan have smartphones. Can access the internet at a low cost. This makes it easy for them to shop online. Increasing penetration and affordable internet are making online shopping accessible to students.
- Students like to order things through messages on social media instead of using traditional websites. They think it is more convenient and personal. Students prefer DM-based ordering over e-commerce websites.
- There is a rising demand for affordable lifestyle products among students. Young people in Pakistan are starting to like the idea of subscription models, where they pay a fee.
- Social media influencers and student bloggers are helping to decide what products are popular among people. They are driving purchasing decisions in the 18-26 age group.

2.4 Market size and Forecast

Pakistan has than one and a half million university students, which is a big and growing group of customers who use digital things. The subscription box market is really big over the world it was worth over thirty two billion dollars in the year two thousand and twenty two which shows that this kind of business works everywhere.

In Pakistan people spend a lot of money on gifts every year during Eid and weddings and when someone graduates from university. The market for things like stationery and other stuff that students need is growing by twelve to fifteen percent every year because more and more people are going to university and young people are spending money on themselves. Online shopping in Pakistan is going to get much bigger by the year two thousand and twenty six and more people will be buying things online every year.

The big chance here is that there is no subscription box brand that is made for university students in Pakistan. CampusBox is, in a position to get a big part of this market that nobody is using right now the CampusBox brand is going to serve Pakistani university students.

3. Target Market

3.1 Market Summary

Campus box's primary customers are University students between the ages of 18 and 26, enrolled in universities across this Islamabad and Rawalpindi. They are active Instagram and Whats-app users who appreciate curated, affordable products and value the experience of receiving something special every month. The secondary market includes parents, friends and partners purchasing gifts subscriptions, as well as University institutions ordering bulk boxes for events.

3.2 User Demographics

Table 2 User Demographics

Demographic Factor	Description
Age	18–26 years (core); parents up to 50 for gift subscriptions
Gender	All genders; primarily female subscribers (70%); male buyers mainly for gifting
Location	Islamabad / Rawalpindi primarily; nationwide online delivery
Income Level	Students with PKR 3,000–8,000/month pocket money
Education	Undergraduate and postgraduate university students
Interests	Stationery, self-care, aesthetics, snacks, productivity, gifting
Online Behaviour	Active on Instagram, TikTok, WhatsApp; discover via reels and explore page
Shopping Habits	Comfortable with DM-based ordering; value fast delivery and aesthetic packaging

3.3 User Persona

Figure 4 User Persona for Campus Box

Figure 5 User Persona for Campus Box

4. Industry and Competitor Analysis

4.1 Competitor Overview

Campus box operate in a niche that has a very little competition, as no other brand is currently offering a monthly subscription box made specially for University students. The closest competitors fall into two categories. First, gift hamper businesses that sell one-time give boxes for general occasions. Second, individual stationery sellers on Instagram who sell single items rather than monthly subscriptions. None of these competitors specially target University student, and this gives campus box are clear advantage in the market.

Table 3 Competitor Overview

Factor	CampusBox	Gift Hamper Sellers	Daraz Stationery
Target Audience	University students	General gifters	General public
Monthly Box	Yes	No	No
Student Focus	Yes — 100%	No	No
Price Range	PKR 700–1,400	PKR 1,000–5,000	PKR 100–500
Customization	Themes + tiers	Yes	None
Campus Presence	Yes	No	No
Delivery	Nationwide	Local mostly	Nationwide
Quality	Curated, high	Varies	Low–Medium

4.2 CampusBox SWOT Analysis

Table 4 SWOT Analysis

STRENGTHS	WEAKNESSES	OPPORTUNITIES	THREATS
First-mover advantage in student subscription box niche Affordable tiered pricing suits student budgets Strong campus access to core demographic Low overhead — home-based operations Dual revenue channel (online + campus)	Small initial team — scaling requires help Limited production capacity per month Dependence on Instagram algorithm Small initial marketing budget	Huge untapped student market across 200+ universities Expansion to Lahore and Karachi Seasonal demand spikes — Eid, exam season Corporate and university society partnerships Gift subscription model for parents	New entrants copying the concept Product price increases due to inflation Student budget constraints during downturns Instagram algorithm changes reducing reach

5. Marketing Plan

5.1 Marketing Objective

- I want to grow the Instagram account of campusbox.pk to over one thousand followers in the year.
- My goal is to have twenty subscribers by the end of the first month and this number should increase to one hundred by the end of the twelfth month.
- I need to make sure that university students in Islamabad and Rawalpindi remember the campusbox.pk brand.
- We should have least one special campaign every few months like one for Eid, one for exam season one for summer and one, for winter.
- When we have a campus market event I want to see least fifteen people come to our stall and buy something from campusbox.pk.

5.2 Pricing Strategy

Table 5 Pricing Strategy

Box Tier	Monthly Price	3-Month Bundle	6-Month Bundle	Pricing Basis
Basic Box	PKR 700	PKR 1,950 (save 150)	PKR 3,700 (save 500)	Material cost + 50% margin

Standard Box	PKR 1,000	PKR 2,800 (save 200)	PKR 5,500 (save 500)	Material cost + 55% margin
Premium Box	PKR 1,400	PKR 3,900 (save 300)	PKR 7,800 (save 600)	Premium items + 50% margin
Gift Box (One-Time)	PKR 1,200 avg	—	—	Competitive gift market rate

5.3 Distribution Channels

- Instagram DMs at campusbox.pk is where people mainly place their orders and subscribe.
- WhatsApp Business is used to confirm orders and give tracking updates and support to customers
- Campus Box also sets up stalls at university campuses every month to sell things directly to students at Riphah and other partner campuses
- For people living in Islamabad and Rawalpindi Campus Box delivers products to their homes using Bykea
- Campus Box delivers products, over the country using TCS Express and Leopards Courier

5.4 Promotional Strategy

- Instagram Reels — unboxing videos, box packing BTS, theme reveals, student testimonials
- Instagram Stories — polls ('what should next month's theme be?'), countdown timers, order updates
- User-Generated Content — customers share unboxing videos with hashtag #MyCampusBox
- Micro-influencer collaborations — university students and lifestyle bloggers in Islamabad
- Seasonal campaigns — Exam Survival Box, Eid Edition, Summer Box, Winter Warmers
- Referral discount — 10% off next box for every successful referral
- Giveaway campaigns — grow followers and generate buzz before each new theme reveal
- Campus flyers and posters at Riphah and partner universities
- WhatsApp broadcast list — loyal subscribers receive early access and exclusive deals

5.5 Brand Identity

- Brand Name: CampusBox
- Instagram Handle: @campusbox.pk

- Slogan: Your Monthly Dose of Student Life
- Brand Colors: Deep Navy (#2E4057) + Teal (#048A81) + Warm White
- Packaging: Branded kraft box, tissue paper, CampusBox sticker seal, ribbon, handwritten note card
- Tone of Voice: Warm, energetic, relatable — speaks directly to Pakistani university students

5.6 Five Year Revenue Plan Overview

Based on subscriber growth projections and seasonal sales, CampusBox targets PKR 180,000 in Year 1 revenue, growing to PKR 710,000 by Year 3 as the subscriber base expands to multiple campuses.

Figure 6 Year Revenue Porjection

Figure 7 Quarterly Revenue Growth – Year 1

6. Financial Plan

6.1 Initial Investments:

The initial investment for CampusBox is around PKR 50,000. Most of the budget is spent on buying starter inventory like stationery, snacks, and self-care items. A portion is also used for packaging materials to make the boxes look attractive and professional.

Some money is allocated to branding, such as logo design and stickers, so the business can create a strong identity. Marketing costs include basic promotions and product photography to attract customers. There is also a small cost for setting up a campus stall and creating an online presence.

Overall, the investment is kept low because the business is starting on a small scale, making it less risky and easier to manage in the beginning.

Table 6 Initial Investments

Item	Cost(PKR)
Starter Inventory	18,000
Packaging Materials	10,000
Branding (logo, stickers)	5,000
Marketing (ads, photography)	7,000
Campus Stall Setup	5,000
Website / Setup	2,000
Miscellaneous	3,000
Total Investment	50,000

Figure 8 Initial Investments

6.2 3 Year Revenue Plan:

The 3-year financial data shows the early growth of CampusBox. In the first year, revenue is relatively low as the business is just starting and building its customer base. Most of the income comes from online subscriptions, along with some contribution from campus sales and gift orders.

In the second year, revenue increases significantly as more customers subscribe and the brand gains visibility. New revenue streams like bulk and institutional orders also begin to contribute.

By the third year, the business becomes more established, and all revenue sources show strong growth. Total revenue reaches 710,000, while net profit increases to 350,000. This steady growth shows that the business is becoming stable, profitable, and ready for further expansion.

Figure 9 3 Year Revenue Plan

6.3 5 Year Revenue Plan:

The 5-year financial projection shows how CampusBox is expected to grow over time. Online monthly subscriptions remain the main source of revenue, increasing steadily as more customers subscribe to the service. Campus walk-in sales, gift box orders, and seasonal editions also show consistent growth as the brand becomes more popular.

From Year 2 onward, bulk and institutional orders start contributing to revenue, which reflects business expansion and partnerships with universities and organizations.

Total revenue increases significantly from 180,000 in Year 1 to 1,500,000 in Year 5. Although costs also rise due to higher production and operational activities, the business becomes more efficient over time.

Net profit grows from 70,000 in the first year to 700,000 in the fifth year, showing strong financial performance and long-term sustainability. This projection clearly indicates that CampusBox has the potential to become a profitable and scalable business.

Table 7 Year Revenue Plan

Revenue Source	Year 1 (PKR)	Year 2 (PKR)	Year 3 (PKR)	Year 4 (PKR)	Year 5 (PKR)
Monthly Subscriptions — Online	90,000	200,000	340,000	500,000	700,000
Campus Walk-in Sales	40,000	80,000	120,000	180,000	250,000
Gift Box Orders	30,000	70,000	110,000	160,000	220,000
Seasonal Special Editions	20,000	50,000	80,000	120,000	180,000
Bulk / Institutional Orders	0	30,000	60,000	90,000	150,000
Total Revenue	180,000	430,000	710,000	1,050,000	1,500,000
Estimated Costs (COGS + Ops)	110,000	220,000	360,000	550,000	800,000
Net Profit	70,000	210,000	350,000	500,000	700,000

Figure 10 5 Year Revenue Plan

6.4 Sales Projections (Quarterly)

These are estimates and actual figures may vary. Sales quantity is expected to grow at 10–15% per quarter as brand awareness builds.

Table 8 Sales Projections

Revenue Source	Q1 (PKR)	Q2 (PKR)	Q3 (PKR)	Q4 (PKR)
Subscriptions	15,000	22,000	27,000	26,000
Campus Sales	8,000	12,000	10,000	10,000
Gift Boxes	3,000	5,000	10,000	12,000
Seasonal Editions	0	5,000	5,000	10,000
Total	26,000	44,000	52,000	58,000

Figure 11 Sales Projections

6.5 Break-Even Analysis

Monthly fixed costs are estimated at PKR 6,000–8,000 (packaging, marketing, delivery). With an average subscription price of PKR 1,000, CampusBox needs approximately 8 active subscribers per month to break even — an easily achievable target. At 20 subscribers (Month 1 goal), the business generates PKR 12,000–14,000 in net profit per month.

6.6 Profit Margin Targets

- Basic Box: 50–55% gross margin
- Standard Box: 55–60% gross margin
- Premium Box: 50–55% gross margin (higher cost items)
- Seasonal / Gift Boxes: 55–65% gross margin

7. Production Plan

7.1 Production & Service Process

CampusBox develops its products through a series of steps which include selecting a product, customizing it, packaging the finished product, and delivering the order to customers. The production process here focuses on using effective methods to assemble and prepare customized boxes which differ from standard manufacturing practices.

The process starts when customers make their first purchase through social media or website platforms. The customer either selects a pre-designed box or chooses to customize their own box by selecting specific items.

After the team receives the order, they start to process the order details. The production team examines the chosen products together with their amounts and the customer-provided special instructions. The step confirms that all requirements need to be understood before box preparation begins.

After this, the inventory checking stage takes place. The team checks to see whether all chosen products exist in their inventory. The team recommends a replacement item when an item is out of stock or they verify the stock status with the customer.

The box assembly process follows as the next operation. The box contains all chosen items which are collected and arranged inside the container. The team dedicates special effort to presentation work which results in an attractive organized appearance for the box.

The packaging stage reaches completion after this step. The box requires proper sealing which may include branding elements that consist of logos stickers and personalized messages. This step improves the total experience for customers.

The delivery process starts after packaging work ends. The delivery service or courier partner receives the box which they deliver to the customer's address.

After delivery, customer feedback may be collected to evaluate satisfaction and improve future operations. The entire procedure guarantees efficient order processing which maintains both product quality and customized service delivery.

7.2 Quality Standards and Custom Order Process

The primary requirement for CampusBox operational standards exists because the company depends on customer satisfaction to generate returning customers. The company uses multiple quality standards to guarantee that each box meets the expectations of its customers.

The selection process needs only trustworthy items which meet customer requirements and deliver satisfaction to customers. The process strictly prohibits the use of expired or damaged items.

The packaging quality of products receives the highest level of priority. The packaging team ensures that each box receives both secure and neat packing which protects the contents during delivery. The packaging design creates visual appeal which improves the experience of opening the product.

The second important quality standard requires accurate results. The production team ensures that all items selected by the customer are correctly included in the box. The team checks each order multiple times to reduce delivery errors.

The delivery process maintains its scheduled time through order preparation which must be completed before the scheduled delivery time. The company strives to deliver its products without any delays because customer trust represents an essential business asset.

The company uses customer feedback to drive its ongoing development process. The company uses reviews and suggestions to discover service problems which help them enhance their overall service performance.

7.3 Custom Order Process

The custom order process serves as the main feature which enables customers to design their own box through CampusBox according to their specific needs.

The process starts when the customer chooses the customization option. The customer has the ability to pick products from three different categories which include snacks and stationery and personal care items. The customers have the ability to define their financial limits together with their specific needs.

The production team begins their assessment of the customization request after they receive it by examining the selected items and their current stock status. The customer will receive contact from the team to verify any modifications or to present different options if the situation requires it.

The box assembly process starts after customers finalize their selections. The team works diligently to ensure the box design matches all of the customer's desired specifications.

The team conducts a last quality assessment which checks both accuracy and presentation before products leave the facility. The box reaches the customer after the team completes its packing process following approval.

CampusBox uses its customization process as a business advantage because it enables the company to deliver customized experiences for customers instead of standard products. The process improves customer satisfaction while establishing deeper connections with business customers.

8. Organizational Plan

8.1 Management Team and Responsibilities

Campus box is managed by a dedicated team of five Riphah International University students, each bringing specialized expertise to a core business function. The team operates with a flat hierarchy to encourage collaboration, rapid decision-making, and shared ownership.

Table 9 Management Team & Responsibilities

Member	Role	Key Responsibilities
Nimra Tariq	Brand & Creative Director	Brand identity, visual design, packaging aesthetics, product photography, report compilation, team coordination, instructor communication.
Komal Atif	Marketing Manager	Instagram content strategy, promotions, competitor research, market analysis, campus marketing, influencer outreach, seasonal campaigns.
Sadaf Iqbal	Finance Manager	Budgeting, pricing strategy, revenue projections, COGS tracking, financial reporting, break-even analysis, expense monitoring.
Areeza Afridi	Production Manager	Box assembly, quality control, raw material sourcing, inventory management, production scheduling, order fulfillment.
Simaab Malik	Operations Manager	Order management, packaging coordination, delivery logistics, customer service, campus stall coordination, payment collection.

8.2 Organizational Structure

CampusBox follows a flat, collaborative organizational structure. The Brand & Creative Directory provides overall strategic direction, while the Marketing, Finance, Production and Operations function operate interdependently. All members actively participate in box assembly and campus events, particularly during peak seasons

Figure 14 Organizational Structure

9. Operational Plan

9.1 Production

CampusBox operates as a home-based business to eliminate commercial rental costs. Box assembly and packing take place in a dedicated, organized home workspace in Rawalpindi. The business follows a systematic monthly production cycle to ensure all boxes are assembled, quality-checked, and dispatched between the 1st and 5th of every month.

9.2 Location

- **Head office & Production:** Operates from the homes of team members based in Islamabad and Rawalpindi, with a primary packing station at the Operations Manager's residence.
- **Sales & Branding:** Campus sales are conducted at Riphah International University Islamabad and partner universities.
- **Future plan:** As the subscriber base grows, a dedicated small packing workspace will be rented to accommodate increased volume.

9.3 Suppliers and Storage

Table 10 Suppliers & Storage

Supply Category	Source	Storage Method
Stationery & Notebooks	Wholesale markets - Raja Bazaar, Urdu bazaar.	Categorized shelves in home workspace

Snacks & Food Items	Local wholesale grocery, Imtiaz/Madinah Cash & carry.	Airtight containers, checked for expiry
Self-Care Products	Wholesale cosmetics suppliers - local markets & online B@B platforms.	Cool, dry storage, away from sunlight
Packaging Materials	Wholesale packaging suppliers - Kraft boxes, tissue, ribbons, sticker seals.	Flat storage under work tables
Delivery	Bykea, in-person handover (Islamabad/Rawalpindi).	N/A

9.4 Order Management Workflow

The following workflow ensures every customer receives a seamless experience from discovery to delivery:

- **Order Placement:** Customer places subscription order via Instagram DM or WhatsApp.
- **Tier Confirmation:** Subscription tier is confirmed (Basic, Standard, or Premium).
- **Payment Collection:** Payment collected via bank transfer, EasyPaisa or JazzCash. Finance Manager verifies receipt.
- **Order Tracking:** Order is added to the master subscriber tracker (Google Sheets), accessible to all team members.
- **Assembly & QC:** Box is assembled in quality-checked per the monthly production timelines.
- **Dispatch:** Box is dispatched via courier or handed over at campus on the 1st - 5th of each month.
- **Tracking Update:** Delivery tracking number is shared with the customer via WhatsApp by the Operations Manager.
- **Follow-up:** A follow-up message is sent 2 days after delivery, requesting a review and feedback.

9.5 Working Hours

- **Box assembly & Packing:** Evenings (6:00 PM - 9:00 PM) and weekends, scheduled around university classes.
- **Subscription Dispatch:** Standard boxes are dispatched between the 1st and 5th of every month.
- **Customer Support:** Available daily via Instagram and WhatsApp DMs from 8:00 AM to 5:00 PM.

10. Feasibility & Market Potential

10.1 Pre-Feasibility Study

This business plan presents the CampusBox for concept and offers a general analysis of its commercial viability. The information is based on primary market research (student surveys at Riphah), secondary industry data from sources including Statista and SMEDA, and analysis of the Pakistani student consumer market. While every effort has been made to provide accurate projections, actual results may vary based on market conditions, subscriber growth rates, and operational execution.

10.2 Purpose of the Feasibility study

The objective of this feasibility study is to demonstrate that CampusBox is a commercially viable business concept with the real addressable market, achievable financial targets, and a sustainable operating model. It serves as the foundation for establishing and scaling the business with the structured approach to investment, marketing, and operations.

10.3 Business Feasibility

- **Low startup cost:** CampusBox needs only PKR 50,000 to start, so the financial risk is very low and the money can be recovered quickly.
- **Proven business model:** Subscription boxes are a successful business idea around the world. Campus box is simply adapting this model for Pakistani students.
- **No direct competition:** Right now, no other company is offering company is offering a monthly subscription box just for university student in Pakistan. This gives CampusBox a first-mover advantage.
- **Good profit margins:** Campus box can make 50-65% profit on each box, which means even with few customers, the business can still be profitable.
- **Easy to grow:** As more students subscribe, CampusBox can buy items in bulk at cheaper rates, which will lower cost and increase profit even more.
- **Two ways to earn money:** CampusBox sells online (via Instagram/WhatsApp) and directly on University campuses. This reduces risk because if one channel is slow, the other can still bring sales.
- **Easy payment for students:** Students can pay using EasyPaisa, JazzCash, or bank transfer, which are already very common and easy to use in Pakistan.

10.4 Market Potential

- **Massive Addressable Market:** Pakistan has over 1.5 million enrolled university students. At Riphah International university alone, capturing just 1% of students (approximately 150 student) at an average of PKR 1,000/month represent PKR 150,000 in monthly revenue from a single campus.

- **Expansion Potential:** Expanding to just 10 universities across Islamabad and Rawalpindi could generate subscriber basis of hundreds, creating a sustainable, rapidly growing business.
- **Gifting Segment Potential:** Pakistan's deep culture of gift-giving during Eid, Birthdays and Graduations create strong seasonal demands spikes. If only 2% of the addressable student market (30,000 students) purchases one gift box per semester at PKR 1,200 average, that represent PKR 36,000,000 in annual potential gifting revenue -- demonstrating the enormous scale of this opportunity.

10.5 Critical Success Factors

For CampusBox to achieve its full potential, the following factors are critical:

- **Consistent, High-Quality Instagram content:** To maintain visibility, attract new subscribers and build a community.
- **Reliable Monthly Delivery:** Students must receive their box on time every month to build trust and ensure renewals.
- **Strong Customer Service:** Fast, Friendly, and helpful DM responses are essential for a smooth subscription experience.
- **Active Campus Presence:** Regular pop-up store build brand visibility and trust directly within the core target market.
- **Advanced Seasonal Planning:** Theme boxes must be prepared well before Eid, exam season and gifting peaks to maximize sales.
- **Quality Consistency:** Every single box must meet the same quality standard to protect brand reputation and reduce subscriber churn.

11. SUMMARY

11.1 Project Cost Summary

The initial cost of CampusBox includes packaging, product sourcing and marketing expenses. Additional costs involve logistics, delivery and customer support operations. Overall, the project requires moderate investment with scalable cost management as the business grows.

11.2 Project Economics

The business generates revenue through monthly subscription fees and brand collaborations. Profitability increases with a higher number of subscribers and bulk partnerships. With proper cost control and marketing strategies, the project has strong potential for long-term financial sustainability.

11.3 Project Summary

CampusBox is an innovative subscription-based service designed to improve student life by delivering curated monthly packages. It combines convenience, affordability and personalization to meet the everyday need of students. The platform connects students with useful products while also supporting small businesses and brands. By using digital technology and modern e-commerce practices, CampusBox creates a smooth and engaging user experience. The project has strong potential to grow across multiple campuses and adapt to changing student trends.

- Provides monthly curated boxes with useful and trendy items
- Targets university students with affordable pricing
- Supports small businesses by promoting their products
- Uses digital platforms for ordering and personalization
- Saves times and effort for students by compiling essentials in one package
- Incorporates seasonal themes and campus trend
- Builds a strong connection with student communities
- Has high scalability across different universities and cities
- Offers opportunities for brand partnerships and collaborations
- Focuses on convenience, affordability and innovation
- Strong potential for growth in the e-commerce and subscription market

12. Conclusion

Campus box is more than a venture, it is a purpose-driven brand designed to fill a tangible void in the Pakistani student experience. It directly addresses the needs of a massive, digitally native and underserved market of over 1.5 million university students who currently lack a lifestyle brand that speaks their language and fits their budget. By combining the globally successful subscription box model with the hyper-localised understanding of Pakistani student culture, CampusBox delivers a unique product that celebrates student life, month after month.

This business plan has formalized the strategic, operational and financial roadmap that transforms this vision into reality. The strength of CampusBox lies in its simplicity and execution. With the lean home-based operational model, a clear dual-channel revenue strategy and dedicated five-member team, the venture is built for both immediate impact and long-term sustainability. The financial model confirms its viability: a modest break-even point of just 8 subscribers, with a scalable path from a PKR 50,000 investment to projected revenues of PKR 710,000 by year 3.

The journey for CampusBox begins at Riphah International University but its potential extends nationwide. As we grow, we envision evolving from a curated box service into a national student lifestyle platform, capable of launching franchise models that empowers student entrepreneurs across Pakistan. CampusBox is more than a monthly delivery, it is a movement to inject joy, reduce stress and build a community where every student will be celebrated - one box at a time.
